Projects

1.YouTube Clone Project in React

Description: Developed a YouTube clone web

application using React, mimicking the core

functionalities of the popular video-sharing platform.

The project aimed to demonstrate proficiency in React framework, front-end development.

Technologies Used: React: Front-end framework for building user interfaces.

CSS: Styled components using CSS for consistent and visually appealing design.

2.Music Player Project Description:

Developed a customizable music player web application using HTML, CSS, and JavaScript, aimed at providing an intuitive and interactive platform for playing audio files.
